

Hi Komatsu Kids!

Test your brain with our Memory Game!

Step 1: Cut out all the cards. (You may need Mum or Dad's help for this)

Step 2: Shuffle up all the cards - mix them up really good!

Step 3: Place all the cards face down, 5 cards across and 6 cards down.

One Player

Turn over one card. Turn over a second card. Do they look the same? If yes, great! You've found a pair! If they don't look the same, turn them back over and remember what it was you saw on the card. Try again to find a matching pair. Time how long it takes you to find all the matching pairs, and when you've finished, shuffle them up and try to beat your last recorded time!

Two Player

Turn over one card. Turn over a second card. Do they look the same? If yes, great! You've found a pair! And you get another turn. If they don't look the same, turn them back over and remember what it was you saw on the card. Then it's your friend's turn to do the same. Keep on taking turns, and when all the matching pairs have been found, count how many pairs each of you have, and the friend with the most pairs wins the game!

Good luck!

Kim, Matt and Sue!
