Komatsu Training Academy – Capability Statement Specialised Training and Professional Development

With Komatsu Training Academy's people-powered training & development services

Komatsu Training Academy is a Registered Training Organisation (RTO) specifically developed to assist our construction, quarry and mining customers by delivering nationally recognised and customised training where they need it – online, on-site, at customers' premises or at our own dedicated training facilities. Our offerings include a mix of fully accredited, nationally recognised courses and modules, along with purpose-designed operator, technical and management training.

Our team of specialist, industry-qualified trainers deliver a broad spectrum of competency and skill-based development programs customised to your business and targeted to meet your specific industry needs. These programs include leadership and management training, operator skill proficiency development and customised technical training.

No matter what your training needs, our industry-specific tailored courses will enhance your people's skills, building your management and workforce capabilities, competencies and their proficiency – ensuring you are best equipped to handle the challenges facing the industries we operate within.

KOMATSU

Driven by your success

Who we are . . .

Komatsu Australia is unique in being the only national distributor across the construction, quarrying and mining industries able to provide customised, in-depth training tools for customers to increase production and therefore profitability.

In addition to a range of training courses, we can also deliver productivity improvement initiatives for our construction, quarry and mining customers suitable for any size site or project.

As a result of our extensive consultation and industry experience, we've helped some of the industry's leading organisations solve complex issues, achieve measurably improved results and build leadership capabilities to improve productivity and performance.

Komatsu Training Academy: Benefits to your Business

As an industry specific RTO, you can be assured that Komatsu Training Academy delivers the very best training from experts who not only know this industry intimately, but who are passionately committed to achieving the right outcomes for you and your workforce.

In today's labour market, where a shortage of experienced service technicians and skilled operators is impacting on the industries we serve, all too often training has become focused on churning out numbers of trainees.

At Komatsu Training Academy, we focus on what is really needed: up-skilling for production improvement, preventive maintenance and safety.

We believe that the difference between a key technician or operator who is merely competent – compared with one who is truly proficient at

their job – can translate into significant benefits to your bottom line.

We understand the challenges of your specific operating environment, and how to work with you to get the very best from your equipment and your management, technical and operational teams.

At Komatsu Training Academy, we understand the difficulties faced by our customers across highly diverse industry sectors – so we adapt delivery of our training modules to ensure we achieve the best outcomes for your investment.

When you need expert training for your people, Komatsu Training Academy is right there with you.

Skills Packages

At Komatsu Training Academy, we recognise that the first step in ensuring safe, productive and profitable worksites is to have plant operators and service technicians who can safely and competently operate and service their machines, then build on these core skills to develop into highly proficient professionals.

We offer a range of training and skills development courses, from industry-accredited machine-specific courses, through to specialist courses that ensure the highest levels of proficiency and professionalism – and capable of delivering measurable and sustainable improvements in productivity, cost reduction, machine reliability and safety.

Operator and technician training courses available through Komatsu Training Academy cover a variety of mining, construction and utility machines including backhoe/loaders, dozers, crushers, dump trucks, excavators (conventional and hybrid), graders and wheel loaders, as well as general systems and technologies.

In addition, Komatsu Training Academy can develop and tailor any training program to suit customers' specific requirements. Contact us to discuss how we can customise your training to meet your specific business objectives.

Our Training HQ: Komatsu Technical Education Centre (KTEC)

KTEC has become Komatsu Australia's primary training centre for operators and technicians in Australia, New Zealand and New Caledonia. It is one of the region's most advanced technical training facilities for mining, earthmoving and utility equipment. Located on more than 3 hectares of land, it has more than 2600 sqm of dedicated training facilities, including seven classrooms, seven technical/electrical laboratories and a large machine operator's workshop.

KTEC also incorporates a number of simulators, providing the ability for both novice and experienced operators to safely learn on a range of machines, from construction and utility size up to ultra-class mining equipment. KTEC was originally designed to specifically increase the technical capability of our own service and support people to the benefit of our customers. It has now evolved to become an important element within our total customer satisfaction experience by ensuring we offer the best trained OEM support in the industry. As a result, we were increasingly being asked to provide technical training for our customers' own service technicians, which has become a growing business for Komatsu Australia. This has now seen the KTEC facility becoming part of Komatsu Training Academy, offering a full suite of accredited and custom-developed educational programs across management, technical and operational training.
